

# SOZ 4X4RL

**The SOZ 4X4RL system, from Solan Systems, offers a comprehensive safety solution for lifting platforms, virtual protected area, cranes (up to 6 meters high) and for the repair of loading docks by service companies / service technicians.**

## The system includes:

- Control and monitoring unit + remote control.
- 4 detection units (4 radar detectors).
- 4 red LED warning lines 2 meters wide.
- Voice warning system.

## System Advantages:

- You can calibrate the detection range using a remote control included with the system, allowing you to set the alert distance.
- The system can be connected without a detector/voice alarm. It is possible to create a safety envelope using only the highlighted alert lines when moving in warehouses or when working at night.
- The system comes as a ready-to-assemble kit including wiring, quick connectors, sensors, red LED warning line lights, and an integrated PA system with volume control.
- The system operates on a voltage of 12-80V DC
