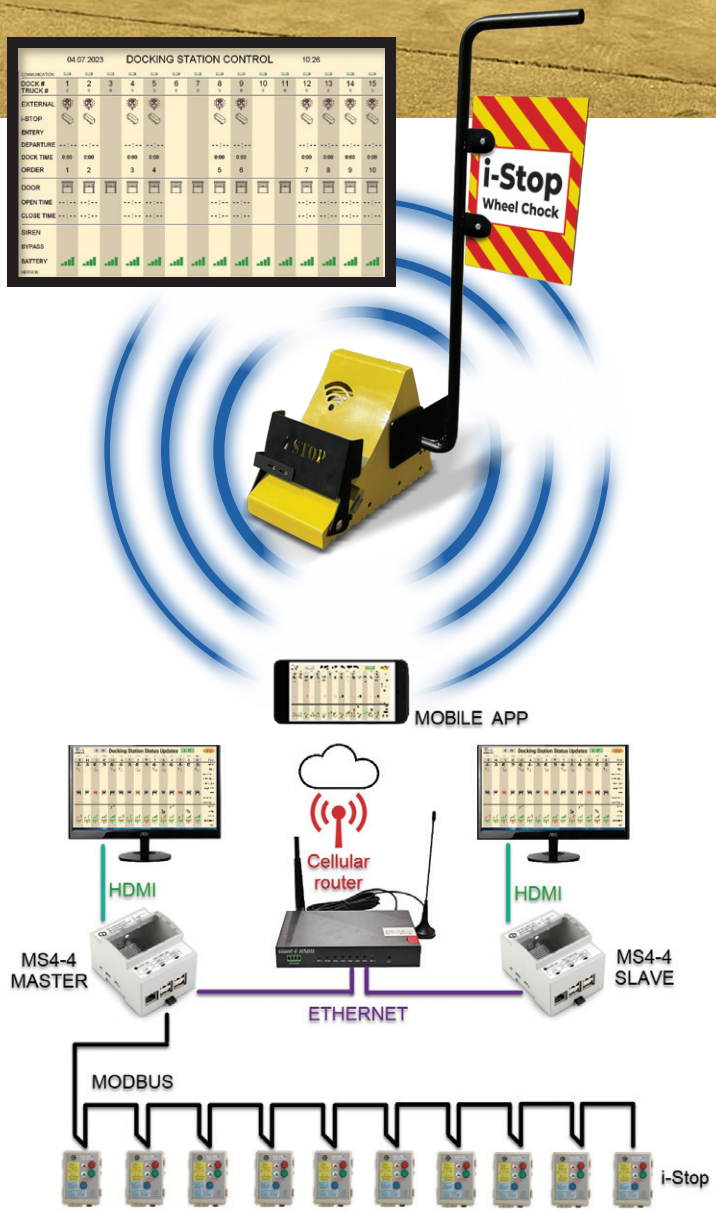
Solan iStop Matrix

Operation, logistics and safety information system



i-Stop Matrix

Saves Energy Costs
•
Effective operational time
•
Strengthen security

All logistics operation data and safety information are available on your mobile device and your command & control unit

The world's first information system that constantly monitors all truck activities in logistic centers including any specific needed operation, logistics performed, and safety measures taken.

i-Stop Matrix Overview & Features:

- Customized software covering no limit of operational docks.
- Detects the arrival and displays the order of getting into the loading dock.
- Get in real-time, smart alerts of any information: the status of the doors, the loading / unloading process.
- Warns of failure to open a door (loss of time = loss of money = less security).
- Available on any mobile phone.
- State of battery charging in the i-Stop system.
- It is possible to interface with existing WMS systems.

System Advantages:

- Compatible with any existing logistics site.
- Does not require prior preparations or adjustments.
- Optimizes existing operational, logistics, and safety methods.
- Provides real-time information + situation analysis that optimizes loading/unloading methods.
- Incorporating the most advanced logistics safety measures taken.
